About Us

Overview

Planning & Initial Development in First Meeting:

We opened this meeting specifically to divide the major project tasks. Each of us reviewed the project requirements and selected areas where we could contribute best. We created a shared task list with deadlines.

Scrum Meetings Structure

Meeting Frequency: 2 times per week

Location: Online Meeting

Duration: 2–3 hours

Meeting Structure & Workflow

Task Division & Planning – Meetings were specifically opened to break down large tasks into smaller ones. – Each team member selected tasks according to their skills and interests. – We ensured that every member understood their tasks and deadlines.

Problem Solving – When facing a problem, the team worked together to find a solution. – We continued trying and discussing all possible solutions until the best one was found. – If the first idea didn't work, we explored alternative solutions or improved it to make it better.

Project Improvement – In every meeting, each member suggested improvements: “What can we add or enhance?” – Ideas were discussed and the best ones were selected for implementation. – Once agreed, we immediately started implementing the ideas into functional features. – If problems arose during implementation, we brainstormed solutions or modified the idea creatively.

Meeting Screenshots

The following screenshots show parts of our real online meetings, displaying task division, idea discussions, and problem-solving. They serve as evidence of active team collaboration over the course of the project: – Screenshot 1: Meetings created 16–18 days ago – initial planning and task assignments – Screenshot 2: Meetings created 2–3 days ago – progress check and problem-solving sessions – All meetings: Conducted online via video calls, demonstrating consistent teamwork and coordination

Sprint Retrospective Notes

What Went Well: Clear and organized task division – Effective collaboration in solving problems online, Open idea sharing

What Could Be Improved: Increase the speed of data processing and analysis Improve documentation for each feature and interface

Action Items for Next Sprint: Implement daily notification feature ,Add mental health tips based on user data , Enhance mobile user experience

Team Strengths

- Persistence: We don't give up until problems are solved
- Collaboration: Everyone participates, listens, and proposes solutions
- Result-Oriented: Turning ideas into practical features and testing them
- Support: Supporting each other and sharing knowledge and expertise

Conclusion

Scrum meetings were active work sessions where: Tasks were divided and assigned, Problems were solved collaboratively, Ideas were shared and implemented, Team members supported each other, We built a better personal mental health monitoring system through teamwork and collaboration
